MenACWY VACCINATIONS FOR STUDENTS

Teenagers and "fresher" students going to university for the first time are advised to have a vaccination to prevent meningitis and septicaemia, which can be deadly.

Older teenagers and new university students are at higher risk of infection because many of them mix closely with lots of new people, some of whom may unknowingly carry the meningococcal bacteria at the back of their noses and throats.

Please contact us to check if you are eligible and to book your vaccination with the Practice Nurse.

QUESTIONNAIRES

Dr Lyon & Partners are currently asking patients for their opinions, recommendations and information regarding their lifestyles to update our practice records.

To help us obtain this information Patients may be asked to complete some simple questionnaires when attending for their appointment.
